BESPOKE LIGHTING DESIGN

L'eleganza, prima di tutto • *Above all, elegance*

L'eleganza, prima di tutto.

È questo che penso quando lavoro a un progetto che si tratti di un singolo oggetto o di un concept più complesso. L'eleganza è il risultato di un sottile equilibrio di stile e armonia, bellezza e discrezione, personalità e contemporaneità.

Questo criterio mi ha guidata nella definizione della nuova BESPOKE LIGHTING DESIGN, non solo una collezione ma un progetto aperto, flessibile, che pur mantiene inalterato il suo forte carattere aziendale.

Bespoke significa "su misura", "sartoriale". Sono abituata a lavorare ricercando l'originalità di ogni situazione, interpretando l'unicità di ogni cliente.

Ho pensato che anche l'elemento luce meritasse lo stesso approccio. Ho pensato che ogni progettista vorrebbe personalizzare gli elementi di arredo di volta in volta.

L'azienda aveva le risorse e le competenze interne per rendere possibile questo progetto: grande artigianalità, capacità di innovazione e di gestione della complessità. Insieme abbiamo guardato avanti cercando un elemento forte, che diventasse il carattere distintivo della collezione, il Bespoke Lighting Design.

Abbiamo puntato sul metallo, che è diventato il leit-motiv del progetto: metallo per la struttura di ogni lampada, per la quale si può scegliere il colore da una gamma di ben 23 varianti; per i decori, che sono pendenti di vari aspetti e misure in metallo con tre finiture disponibili; per le catene in varie fogge e dimensioni - dalla finissima di gioielleria alle robuste catene di sostegno della lampada - realizzate una per una su disegni esclusivi. E rete di metallo intrecciato anche per i paralumi come alternativa ai tanti tessuti pregiati in seta, lino e velluto, che possono essere utilizzati anche per i rivestimenti di sedute, coordinando e declinando un intero arredamento. Abbiamo sfruttato le caratteristiche tecniche di questo materiale per farne risaltare l'eleganza intrinseca.

L'eleganza, appunto.

Above all, elegance.

This is what I think about when I am working on a project that involves a single object or a more complex concept. Elegance is the result of a fragile equilibrium between style and harmony, beauty and discretion, personality and modernity.

This criteria has guided me in defining the new BESPOKE LIGHTING DESIGN, which is not only a collection, but also an open, flexible project that also keeps its strong company character unaltered.

"Bespoke" means "made to measure", "tailor-made". I am used to working and looking for originality in every situation, interpreting each customer's uniqueness.

I believe that even the lighting element deserves the same approach. I believe that every designer should personalize furnishing elements from time to time.

The company had the resources and the internal capabilities that made this project possible: great craftsmanship along with the ability to innovate and manage complexity.

Together we looked ahead, looking for a strong element that would become the distinctive character of the Bespoke Lighting Design collection.

We chose metal, which became the leit-motiv of the project: metal for each lamp's structure and whose colour can be chosen from among 23 different shades; for the decorations, which are pendants in various types and sizes in metal with three finishes available; for the chains in various shapes and dimensions - from the finest jewellery chains to the more robust chains to support the lamp - made one by one in exclusive designs. There is also interwoven metal netting for the lampshades as an alternative to the many types of valuable fabric such as silk, linen and velvet, and which can also be used as seat covers, in order to coordinate the entire decor.

We took advantage of the technical characteristics of this material in order to enhance its intrinsic elegance.

Elegance, exactly.
