New Trade Fair Milan

phook-sus)

Bea is New Concept.

Instead of articulating all ergonomic technology by exposing an exo-skeleton, like much of recent office seating solutions, Bea incorporates all in its flexible and sensual shell.

In its loaded version, it includes the strictest ergonomic and safety standards (EN, ANSI-BIFMA), while in its non-work versions it becomes a residential lounge chair.

An internal frame in Zytel® 80G33 is covered with double layer of reinforced Pebax®, using the same technology and materials utilized to make athletic footwear. Housed in its task intensive model is a BeaRevo synchron mechanism with push & click controls, armrests are adjustable in height and inclination, lumbar adjustment, and forward seat slider. Upholstered in flame-retardant anti-transpiration fabrics.

Bea è un nuovo concept.

Invece di esporre tutta la tecnologia ergonomica rendendo visibile strutture tipo esoscheletro, come molte recenti sedute, Bea incorpora tutto nel suo guscio flessibile e sensuale.

Nella sua versione più lavorativa include le più esigenti norme di sicurezza ed ergonomia (EN, ANST-BIFMA), mentre nelle sue versioni extra-lavoro diventa una sedia per la casa.

Un telaio interno in Zytel® 80G33 è coperto da una doppia guaina di Pebax® caricato, utilizzando la stessa tecnologia e materiali delle calzature sportive. Nella sua versione più operativa sono inglobate: meccanica synchro BeaRevo comandata da pulsanti push&click, regolazione lombare, traslatore avanzato sedile, braccioli regolabili in altezza ed inclinazione. Sedile e schienale rivestiti con tessuti ignifughi ed antitranspirazione.

## BEA instruction manual

Bea has 7 push-and-click button controls to adjust its ergonomic setup.

on the left side of the seat

1. forward seat slider adjustment;
2. synchron lock/unlock inclined positions

on the right side of the seat

3. vertical height adjustment column gas lift;
4. tension adjustment to body weight;
5. lumbar support height adjustment;

under each armrest

- A. armrest height adjustment
- B. armrest angle adjustment

Bea dispone di 7 pulsanti push-&-click per regolare il suo assetto ergonomico.

sul lato sinistro del sedile

1. regolazione traslatore sedile avanzato;
2. blocco/sblocco synchro a posizioni inclinazione;

sul lato destro del sedile

3. regolazione in altezza colonna a gas;
4. regolazione tensione al peso corporeo;
5. regolazione altezza supporto lombare;

sotto ogni bracciolo

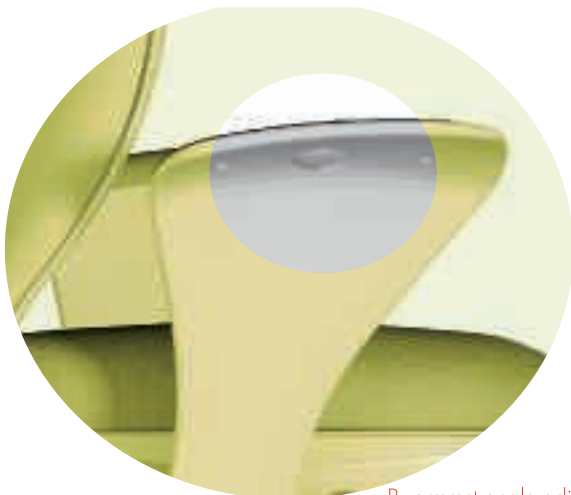

- A. regolazione altezza braccioli;
- B. regolazione inclinazione braccioli

## BEA facts

object: New Concept

name: Bea

typology : task intensive ergonomic

n° components project: 87

materials: polypropelene, nylon+fg, aluminum,  
steel, flame retardant foam, flame retardant fabrics

mechanism: push-button BeaRevo synchron

launch: April 2006

delivery: September 2006

oggetto: New Concept

nome: Bea

n° componenti progetto: 87

materiali: polipropilene, nylon +fv, alluminio, acciaio,  
gomma ignifuga, tessuti ignifughi

meccanismo: BeaRevo synchron a pulsanti

introduzione: Aprile 2006

consegne: Settembre 2006

Design: Doriana e Massimiliano Fuksas
