# Slice

Sedia, poltrona e sgabello compongono la famiglia di sedute Slice. Elemento di unicità e distinzione, il dettaglio delle sottili aperture laterali dell'imbottitura in tessuto o pelle che, formando degli occhielli nella parte alta dello schienale, lasciano intravedere la struttura in faggio. Sedute profonde e schienali lievemente inclinati sottolineano l'attenzione al comfort.

*A chair, armchair and stool compose the Slice family of seating. A unique and distinct element is the detail of the slender side openings of the fabric or leather upholstery, creating eyelets in the upper part of the backrest, allowing a glimpse of the beech frame. Deep seats and slightly inclined backrests emphasize the attention to comfort.*
